SHREYASH TRIPATHI

Full-Stack Developer & UI/UX Engineer · AI-first SEO, AEO & GEO

Noida, India · +91 81608 90957 · tshreyash024@gmail.com · shreyashtripathi.in · linkedin.com/in/shreyashtripathi9 · github.com/Yaminam · dev.to/shreyashtripathi

PROFESSIONAL SUMMARY

Full-stack developer and UI/UX engineer shipping features on AI-integrated SaaS platforms and marketing sites at a digital product agency, across React, Next.js (App Router), TypeScript, Node.js, Supabase and PostgreSQL. I also make sites findable: on my own site I set up technical SEO, structured data and AI-search (AEO/GEO) signals end to end, getting it indexed and ranking within its first month and recognised by ChatGPT. Author of the Job-Ready Series (9 interview-prep books) and 4 technical articles. Based in Noida, originally from Ahmedabad; open to relocation and remote work.

WORK EXPERIENCE

Garage Collective - Noida, India **Feb 2026 - Present**

Promoted from AI Trainee to Junior Developer, UI/UX

- Developed and deployed an AI content-generation agent (OpenAI / Anthropic SDKs) that produces an Instagram post, a LinkedIn post and a blog post daily, cutting manual content effort by roughly 40%.
- Shipped UTM auto-tagging and partner-portal link generation on a multi-tenant affiliate-marketing SaaS platform (Next.js, Supabase).
- Integrated a new analytics dashboard module into an internal campaign-management platform, redesigned its Excel export reporting and fixed post-integration bugs.
- Supported a dashboard UI redesign for a multi-tenant SEO and AI-visibility tracking platform.
- Built an internal zero-knowledge asset, credential and billing manager end to end (Next.js, Supabase, WebCrypto): QR asset labels, invoice OCR, multi-currency spend tracking, AES-256-GCM encryption in the browser.
- Rebuilt a 45-page K-12 school marketing website, including a mobile-layout overhaul fixing horizontal scroll, tap targets and navigation.
- Delivered dark-mode, responsiveness and TypeScript fixes across a social-listening platform, an AI call-screening product site and a startup/investor marketplace; assembled a multi-brand portfolio site for three client products.

SEO, AEO & GEO (AI-FIRST SEARCH) - SHREYASHTRIPATHI.IN

- **Technical SEO:** prerendered a Vite + React SPA at build time so crawlers see full content (134 words to ~18,000 across 16 pages); canonical URLs, sitemap with images, redirects for www and duplicate hosts, strict security headers.
- **Structured data:** JSON-LD graph for Person, ProfilePage, WebSite, Service, Book, BookSeries, CollectionPage and BreadcrumbList; Lighthouse SEO, accessibility and best practices at 100.
- **AEO / GEO:** llms.txt for AI assistants, answer-style FAQ content, and middleware that logs AI crawler visits (GPTBot, ClaudeBot, PerplexityBot) to GA4 via the Measurement Protocol.
- **Search tooling:** Google Search Console, Bing Webmaster Tools, IndexNow and GA4 with lead events; tuned titles from real Search Console queries.
- **Results (first month):** indexed and ranking around position 3 for my name; new book pages earned more search clicks than the home page within 2 weeks; ChatGPT identifies me and links my portfolio.

PROJECTS

Job Portal - Full-Stack Recruitment Platform (solo) **case study**

- Next.js 15 App Router + TypeScript: job search with filters, saved jobs, application tracking, dashboard and employer job posting; 6 REST API routes with bcrypt + JWT auth and an 8-table PostgreSQL schema.

SketchRace - Real-Time Multiplayer Drawing Game (team, backend) **case study**

- Built the Socket.IO game server: rooms, live drawing sync, server-timed rounds, turn rotation and speed-based scoring across 10 real-time event types.

PurrCase - Custom Phone-Case E-Commerce (team, frontend) **case study**

- Next.js 14 + TypeScript storefront and a 3-step case designer with canvas-based cropping; Prisma, PostgreSQL, Kinde auth, Stripe checkout and Resend emails.

Portfolio - shreyashtripathi.in **live**

- Prerendered React + TypeScript site with 4 case studies, a 9-book library with free previews, and strict CSP; mobile Lighthouse performance 30 to 70-80.

PUBLICATIONS

- **Job-Ready Series** (author): 9 interview-prep books, about 3,500 pages: System Design, DSA in Java / Python / C++, DBMS, Operating Systems, Computer Networks, DevOps, Full-Stack TypeScript & Next.js. shreyashtripathi.in/books
- **4 technical articles on dev.to:** prerendering a Vite app for SEO and speed, a Socket.IO game server, a WebCrypto zero-knowledge vault, and a Next.js 15 job portal. dev.to/shreyashtripathi
