SHREYASH TRIPATHI

Full-Stack Developer & UI/UX Engineer · React, Next.js, React Native

Noida, India · +91 81608 90957 · tshreyash024@gmail.com · shreyashtripathi.in · linkedin.com/in/shreyashtripathi9 · github.com/Yaminam

PROFESSIONAL SUMMARY

Full-stack developer and UI/UX engineer at a digital product agency, shipping web and mobile products across 20+ client and SaaS builds: a React Native finance app, dashboard overhauls and design systems for multi-tenant platforms, and AI-powered features. I work across React, Next.js (App Router), TypeScript, React Native/Expo, Node.js, Supabase and PostgreSQL, and own features end to end, from UI and UX through APIs and deployment. Based in Noida, originally from Ahmedabad; open to relocation and remote work.

WORK EXPERIENCE

Garage Collective - Noida, India **Feb 2026 - Present**

Junior Developer, UI/UX (promoted from AI Trainee)

- **Finance mobile app:** built and shipped a React Native + Expo Android app for a client-profitability and cash platform for service businesses: role-based home screens, a finance inbox with swipe-to-approve, invoice PDFs and reminders, offline mode, six home-screen widgets, push notifications and security hardening (SSL pinning, secure storage, biometric lock).
- **Startup and investor platform:** led a dashboard UI overhaul and design-system pass, brought investor dashboards to parity with the founder dashboard, redesigned the marketing and campaign landing pages and fixed build-breaking TypeScript errors (Next.js, Tailwind CSS).
- **Agency work-management platform:** redesigned the internal tool end to end on one design system: director and team-lead dashboards, a team capacity board, project and issue views, attendance, dark mode, an email pipeline and tickets; built its CRM landing page with a request-access flow.
- **AI content agent:** built and deployed an agent (OpenAI / Anthropic SDKs) that produces an Instagram post, a LinkedIn post and a blog post daily, cutting manual content effort by roughly 40%.
- **Zero-knowledge vault:** built an internal asset, credential and billing manager end to end (Next.js, Supabase, WebCrypto) with QR asset labels, invoice OCR, multi-currency spend tracking and AES-256-GCM encryption in the browser.
- **SaaS features:** shipped UTM auto-tagging and partner-portal link generation on a multi-tenant affiliate-marketing platform, an analytics dashboard module for a campaign-management platform, and dashboard UI for an AI search-visibility tracker (ChatGPT, Gemini, Claude, Perplexity).
- **Marketing sites:** rebuilt a 45-page K-12 school website with a mobile-layout overhaul fixing horizontal scroll, tap targets and navigation.

PROJECTS

Job Portal - Full-Stack Recruitment Platform (solo) **case study**

- Next.js 15 App Router + TypeScript: job search with filters, saved jobs, application tracking, dashboard and employer job posting; 6 REST API routes with bcrypt + JWT auth and an 8-table PostgreSQL schema.

SketchRace - Real-Time Multiplayer Drawing Game (team, backend) **case study**

- Built the Socket.IO game server: rooms, live drawing sync, server-timed rounds, turn rotation and speed-based scoring across 10 real-time event types.

PurrCase - Custom Phone-Case E-Commerce (team, frontend) **case study**

- Next.js 14 + TypeScript storefront and a 3-step case designer with canvas-based cropping; Prisma, PostgreSQL, Kinde auth, Stripe checkout and Resend emails.

Portfolio - shreyashtripathi.in **live**

- Prerendered React + TypeScript site with case studies, a book library and strict CSP; Lighthouse SEO, accessibility and best practices at 100, mobile performance 30 to 70-80; ranks for my name in its first month.

PUBLICATIONS

- **Job-Ready Series** (author): 11 interview and job-switch books, about 4,200 pages, on DSA, DBMS, OS, Computer Networks, System Design, DevOps, Cloud, Salesforce and Next.js. shreyashtripathi.in/books
- **4 technical articles** on dev.to: prerendering a Vite app, a Socket.IO game server, a WebCrypto vault and a Next.js 15 job portal. dev.to/shreyashtripathi

TECHNICAL SKILLS

Languages: TypeScript, JavaScript, Java, C++, Python, SQL
Frontend: React, Next.js (App Router), Vite, Tailwind CSS, Radix UI, shadcn/ui, Framer Motion, GSAP, Responsive Design
Mobile: React Native, Expo (EAS, Router), Android widgets, push notifications, secure storage
Backend & Data: Node.js, Express.js, REST APIs, Socket.IO, PostgreSQL, Supabase, MongoDB, Prisma
AI: OpenAI API, Anthropic Claude SDK, AI content pipelines
Tools: Git, GitHub, Vercel, Postman, Lighthouse, Google Search Console, GA4

EDUCATION

JECRC University, Jaipur - B.Tech, Computer Science Engineering (CGPA 8.1) **2022 - 2026**

ACHIEVEMENTS & CERTIFICATIONS

- Top 10 Finalist, Smart India Hackathon (200+ teams)
- Top 10 Finalist, University Ideathon
- Apna College - Alpha (DSA with Java)
- Summer Analytics 2024, IIT Guwahati
